PROGRAMME SCHEDULE

SILENT CONFERENCE GUIDELINES

Equipment Etiquette

- **Match the channel:** Look for visual cues at the stage or presentation screen. All The Receivers for the headphones feature channel numbers for the particular screen, Depending on the channel. Switch your receiver to match the Channel of the stage you are watching. [1, 2, 3]

Control your own volume: Use the built-in dial on the headset to adjust the audio to a comfortable level.

- **Keep headphones on while seated:** Even if you want to multitask, leaving headphones off while sitting in a session area can make it tempting to talk out loud, which disrupts others.

- **Return or sanitize:** When moving between main zones or exiting the event, return the headphones to the designated service desks so staff can sanitize them for the next group.

Room Noise & Communication

- **Whisper in the main hall:** Because there is no ambient loudspeaker noise, the room can feel deceptively quiet. Speak in low whispers if you must talk, as normal speaking voices carry easily across the space.

- **Use designated microphone systems for Q&A:** If you want to ask a question, do not shout. Please walk to the aisle where microphone is placed for asking questions, Wait for your turn. A two-way audio microphone or wireless delegate mic is placed so the speaker and the rest of the audience can hear you through their headsets.

- **Take long discussions outside:** If you need to network, take a phone call, or have an extended conversation with a colleague, step out to the lobby or visit a dedicated.

Navigating Sessions

- **Switch channels to sample content:** If a presentation isn't meeting your expectations, you don't need to physically get up and walk away. Simply toggle to another channel to sample a parallel session running in the same room. [1, 2, 3]
